References

Acknowledgements

- Usage of model can result in expedited time to find new superconductors
- Can be used in conjunction with regression model made on this data (Hamidieh 2018) to find high-temperature superconductors
- Further studies can test the accuracy of this model by experimentally verifying superconductivity in the materials predicted

I would like to thank Leo Lo and Dr. Serena McCalla for their mentorship through the iResearch Institute.

I would also like to acknowledge my parents for their constant support.
