

A Machine Learning-Enabled Study of 2D Superconductivity

Application of the XGBoost Algorithm

Rajeev Atla

John P. Stevens High School

July 24, 2020

Introduction

XGBoost

Methods

Discussion

Conclusion

References

Acknowledgements

- Was used to process data from Large Hadron Collider (LHC) [ref]
- Bagging
 - Won the Kaggle competition
-

I would like to thank Leo Lo and Dr. Serena McCalla for their mentorship through the iResearch Institute.

I would also like to acknowledge my parents for their constant support.
